DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, drawn to workpiece-transfer device with a product-housing section and a material-housing section, classified in class 414, subclass 796.9.
 - II. Claims 12-18, drawn to workpiece-transfer device with a plurality of suction pads, classified in class 83, subclass 152.
2. The inventions are distinct, each from the other because of the following reasons:

Invention of Groups I and II are related as separate inventions. They are distinct because the inventions of Group I does not require the specific details of suction pads of Group II for patentability as evidenced by the omission thereof from Group I and the invention of Group II does not require the specific details of the product-housing section and the material-housing section of Group I for patentability as evidenced by the omission thereof from Group II.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3724

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
